

Recommended Certificate for Energy Conservation Technology

Certificate No. : JNJS-0003-2007

Name of Applicant : VIA Technologies, Inc

Address of Applicant : 1F,531,Chung-Cheng Road, Hsin-Tien,Taipei,Taiwan

Certified Object: PowerSaver™

Object Description:

An advanced power management technology of instantaneous performance and power consumption control developed according to ACPI specification.

Certification Standard:

CSC/G2603-2005 Evaluation guides of the energy conservation technology.

GB/T15320-2001 Evaluation guides of the energy conservation product.

Conclusion:

Experts of CSC conducted technical certification process to PowerSaver™ technology developed by the subject company and certified that the technology can adjust dynamically frequency and voltage of CPU according to required performance of a real user and effectively achieve the objective of lowering CPU power consumption with better energy efficiency and economic benefit. The technology is practically applicable and good for promotion in pertinent situation.

After comprehensive certification process, the technology is certified as energy efficient technology and recommended as such.
